

WEATHERPROOFING ADVISORS LIMITED

Virgin Media, Baguley

www.weatherproofing.co.uk

Weatherproofing Advisors were successfully appointed to carry out a full roof refurbishment to an office building in Baguley for and on behalf of Virgin Media.

The main office building was covered by an aged bituminous membrane system which had reached the end of its useful service life. Numerous areas of water ingress were causing ongoing issues internally and so Weatherproofing Advisors were commissioned to undertake a full roof condition survey. The survey incorporated a number of investigative core samples which highlighted that although the existing covering had aged, it was still able to be overlaid.

A new high-performance Single Ply membrane system was proposed as an overlay to the bituminous waterproofing. This new covering also provided a substantial thermal upgrade to the building via the introduction of a 100mm thick PIR insulation board, bringing the roof's U-Value in line with the relevant building regulations whilst being backed by a 20-year guarantee.

SPOTLIGHT ON SERVICE

Also, whilst full safe access was available to the roof area via substantial scaffolding, the client took the opportunity to remove a large section of redundant roof-mounted plant and associated steel work. In addition, a full perimeter handrail system was installed upon completion of the works providing future safe access for roof maintenance.

The client is extremely happy with the project delivery, especially when considering the additional challenges of a programme that ran throughout winter. The roof was handed back to the client within the agreed project duration and within budget.
