# Weatherproofing Advisors were successfully appointed to refurbish the wall cladding at the SSE Training Centre in Perth

SSE's Training Centre in Perth is a key facility within the company's property stock. SSE staff from all over Scotland use the facility for various training programmes.

The existing cladding was showing the typical signs of degradation and failure associated with a building of this age and type.

The coatings were delaminating in various areas, and the facades were starting to look faded and discoloured.

WPA conducted a comprehensive survey of the wall cladding. In conjunction with our supply chain partners, we completed a specification aimed at addressing the issues identified.

The solution was geared towards improving the building aesthetics with minimum disruption to ongoing operations within the building.

## SPOTLIGHT ON SERVICE

The first stage of the project involved setting up a secure compound adjacent to the building.

The preparation works involved masking of the windows, power washing all elevations, application of a primer then 2 coats of the Tor Unicover S system.

The client expressed satisfaction with the site management and quality of workmanship, despite the works being executed at a live, sensitive building.

Moreover, the coating solution comes back with a 20 year warranty, a testament to its quality and reliability. The guarantee is further supported by our comprehensive AfterCare programme ensuring that the roof remains in optimal condition for its guaranteed lifespan.
